

## **Environmental and Energy Efficiency**

## **Management Policy**

At Coxabengoa, we are aware that preventing and minimizing negative environmental impacts is a strategic and global objective, and we undertake the following commitments:

- Minimize energy consumption and greenhouse gas emissions in all organizational operations.
- Promote energy efficiency and the production and use of renewable energy sources, supporting the decarbonization of the economy and the fight against climate change.
- Raise awareness about the sustainable use and protection of water and marine resources, offering solutions to prevent water scarcity and promoting universal and safe access to this vital resource.
- Adopt circular economy practices, minimizing waste generation in our projects by promoting reuse, recycling, and resource efficiency.
- Encourage innovation and best practices in our facilities, products, services, and processes, including design and procurement stages, constantly seeking solutions that improve energy performance, reduce pollution, and contribute to a cleaner and healthier environment.
- Protect biodiversity by avoiding the degradation of natural habitats and ensuring ecological restoration when necessary.
- Engage all stakeholders, including our own staff, suppliers, customers, and other collaborators, understanding that they are all integral parts of our environmental and energy efficiency management system.
- Enhance awareness and competence in energy efficiency and sustainable practices through training and encouraging the active participation of employees and other stakeholders.
- Strictly comply with all laws, regulations, and environmental commitments applicable to all our activities.
- Set objectives and targets for the continuous improvement of our environmental and energy performance by providing the necessary resources and ensuring access to all necessary information to regularly measure and monitor compliance with this policy and its commitments.

Enrique José Riquelme Vives

Executive Chairman
